Detailed description and percentage of the contribution:

Author number	Detailed description of the Author's contribution	% of the contribution

Recommended application of the CRediT taxonomy (<https://credit.niso.org/>):

1. Conceptualization – ideas; formulation or evolution of overarching research goals and aims. **2. Writing – original draft** – preparation, creation and/or presentation of the published work, specifically writing the initial draft (including substantive translation). **3. Writing – review & editing** – preparation, creation and/or presentation of the published work by those from the original research group, specifically critical review, commentary or revision – including pre- or post-publication stages. **4. Visualization** – preparation, creation and/or presentation of the published work, specifically visualization/data presentation. **5. Validation** – verification, whether as a part of the activity or separate, of the overall replication/reproducibility of results/experiments and other research outputs. **6. Resources** – Provision of study materials, reagents, materials, patients, laboratory samples, animals, instrumentation, computing resources, or other analysis tools. **7. Data curation** – Management activities to annotate (produce metadata), scrub data and maintain research data (including software code, where it is necessary for interpreting the data itself) for initial use and later re-use. **8. Formal analysis** – application of statistical, mathematical, computational, or other formal techniques to analyse or synthesize study data. **9. Funding acquisition** – Acquisition of the financial support for the project leading to this publication. **10. Investigation** – Conducting a research and investigation process, specifically performing the experiments, or data/evidence collection. **11. Methodology** – development or design of methodology; creation of models. **12. Project administration** – management and coordination responsibility for the research activity planning and execution. **13. Software** – Programming, software development; designing computer programs; implementation of the computer code and supporting algorithms; testing of existing code components. **14. Supervision** – oversight and leadership responsibility for the research activity planning and execution, including mentorship external to the core team.

Persons who have contributed to the work but are not Authors and who have agreed to be named in the annotation to the article:

Name and surname	
Affiliation
