

CONTENTS

Tomasz Sieńko, Jerzy Szczepanik, Tadeusz J. Sobczyk: Study of the application of a multiphase matrix converter for the interconnection of the high speed generation to the grid	3
Dariusz Borkowski: Control strategy for maximizing conversion efficiency of a small hydropower plant	15
Željmíra Ferková, Ján Kaňuch: Synchronous motor prototype with an external rotor using permanent magnets	25
Tomasz Lerch, Tomasz Matras: Odeing the phenomenon of free and forced magnetization in three-phase transformers	35
Alejandro Fernández Gómez, Maciej Sułowicz, Tadeusz J. Sobczyk: The influence of mechanical faults on induction machines with electrical faults	43
Andrzej Herbst: Two constructions of IE4 efficiency class synchronous motors with distributed and concentrated winding	57
Lucjan Setlak: Overview of aircraft technology solutions compatible with the concept of MEA	67
Janusz Kołodziej, Marcin Kowol, Tomasz Garbiec: An analysis of the influence of selected design and material parameters on high-speed eddy-current brake performance	77
Marcin Kowol, Janusz Kołodziej, Marian Łukaniszyn: An analysis of magnetic gear performance	87
Piotr Mynarek, Marcin Kowol: Thermal analysis of a PMSM using fea and lumped parameter modeling	97
Piotr Bogusz: Influence of control parameters on properties of the high speed two-phase switched reluctance drive	109
Wojciech Burlikowski, Zygmunt Kowalik: Error analysis in mathematical model of electromechanical actuator using Hamiltonian equations	119
Adrian Mlot, Mariusz Korkosz, Marian Łukaniszyn: A single-phase slotless axial-flux low-power generator with ferrite magnets	129
Piotr Bogusz, Mariusz Korkosz, Jan Prokop: Analysis of the influence of winding configuration on the properties of a switched reluctance motor	139
Piotr Bogusz, Mariusz Korkosz, Piotr Wygonik: Studies of the permanent magnet DC machine	151
Željmíra Ferková: Influence of the arrangement and sizes of magnets on the cogging torque of PMSM	161
Sebastian Berhausen, Andrzej Boboń, Roman Miksiewicz: Measurement verification of a field-circuit model of the 55.5 MVA hydrogenerator	173
Grzegorz Kamiński, Paweł Góralski: The influence of geometric dimensions on torque value in a complex motion common magnetic circuit electrimagnetic converter	183
Roman Krok, Marian Paszkó: The modernization of turbogenerators as a method of decreasing electrical energy production costs	191
Paweł Idziak, Mariusz Barański, Wiesław Łyskawski: Compared analysis of LSPMSM and squirrel-cage motor exploitation with variable rotational speed	203
Łukasz Sienkiewicz, Jean-François Rouchon, Mieczysław Ronkowski, Grzegorz Kostro: A new prototype of piezoelectric bending resonant transducer for analysis of soft tissues properties	209

Piotr Gajewski, Krzysztof Pieńkowski: Analysis of a wind energy converter system with PMSG generator.....	219
Sebastian Szkolny, Olgierd Małyszko: Hardware-in-the-loop simulator for testing wind turbine generators.....	229
Uwe Schuffenhauer, Norbert Michalke: Calculation methods for eddy current losses with the example of a permanent magnet excited synchronous machine inside the threshing cylinder of a combine harvester	241
Andrzej Bytnar, Sławomir Wróblewski: Online diagnostics of the technical condition of the turbogenerator stator core suspension.....	251
Aleksander Leicht, Krzysztof Makowski: The employment of a single-phase capacitor induction motor for stand-alone generating operation	259
Paweł Zalas, Jan Zawilak: Gentle synchronization of two-speed high-power synchronous motor out of over synchronous speed.....	271
Dariusz Kapelski, Bartosz Jankowski, Marek Przybylski, Barbara Ślusarek: The influence of cryogenic temperatures on the characteristics of a brushless motor	281
Agnieszka Banach, Witold Mazgaj: Specific power loss of typical dynamo steel sheets	291
Tomasz Węgiel, Adam Warzecha, Witold Mazgaj: Modelling of a permanent magnet electrical machine with stator core anisotropy	301
Przemysław Krzyk, Natalia Pragłowska-Ryłko, Maciej Sułowicz: Application of interpolated discrete fourier transform method in the diagnostics of cage induction motors.....	315
Krzysztof Ludwinek: FEMM utilisation in representation of inductance distributions in a salient pole synchronous generator circuital model in no-load state	325
José Gregorio Ferreira, Tadeusz J. Sobczyk, Adam Warzecha: Multicriteria diagnosis of synchronous machine using the welch method	343
Rafał Piotuch, Ryszard Pałka: IPMSM with SMC rotor – optimization and experimental results	353
Michał Radzik, Tadeusz J. Sobczyk: Analysis of a synchronous machine driven by an internal-combustion engine	363
Grzegorz Kamiński, Rafał Jakubowski, Emil Kupiec: Cooling methods of linear motors for a PRT drive.....	373
Jan Szczypior, Rafał Jakubowski: Thermal calculations and testing of external rotor permanent magnet machine	383
Marcin Szczygieł, Krzysztof Kluszczyński: Rotary-linear induction motor based on the standard 3-phase squirrel cage induction motor – constructional and technological features.....	395
Marek Ciurys, Ignacy Dudzikowski: Analysis of a brushless DC motor integrated with a high-pressure vane pump	407
Maciej Gwoźdiewicz, Jan Zawilak: Permanent magnet synchronous motor.....	417
Tadeusz Glinka, Artur Polak, Adam Decker, Andrzej Sikora: Equivalent circuits used in the diagnostics of insulation in power transformers	423
