

## CONTENTS

PREFACE .....	3
---------------	---

### AERODYNAMICS OF BUILDINGS AND STRUCTURES

Bosak G.: Wind tunnel tests of wind pressure distributions over wall and roof surfaces of a utility building with openwork side walls .....	5
Bosak G., Flaga A.: Analysis of aerodynamic interference between a high-rise building and its immediate city surroundings .....	23
Flaga A., Porowska A.: Wind-tunnel modelling of the phenomenon of railway wagons rolling over under strong crosswind action .....	35
Flamand O.: Scale questions in wind engineering experimentation .....	51
Flay R.G.J.: Model tests of wind turbines in wind tunnels .....	63
Kinash R.I., Huk J.S.: Geographical altitude coefficient utilisation for wind gust loading determination in the mountainous terrain of the Transcarpathian region .....	83
Lipecki T.: The relationship between wind pressure on the surface of rectangular prisms and atmospheric boundary layer parameters .....	91
Lipecki T., Bęc J., Jamińska P.: A comparative study of along-wind and crosswind responses of steel chimneys according to Polish and Eurocode standards .....	107
Nowicki T.: The Discrete Vortex Method for estimating how surface roughness affects aerodynamic drag acting on a long cylinder exposed to wind .....	127
Owen J.S.: Windborne debris in the urban environment .....	145
Takeda F., Yoshino T., Uematsu Y.: Design wind force coefficients for free-standing canopy roofs of membrane structures .....	167
Uematsu Y., Shimizu Y., Miyake Y., Kanegae Y.: Wind-induced scattering of permeable unit flooring decks loosely laid on rooftops and balconies of high-rise buildings .....	191

### ENVIRONMENTAL EFFECTS ON BUILDING MATERIALS, STRUCTURES AND PEOPLE

Benčat J., Hadzima B.: Full-scale dynamic testing of the corrosion-damaged, steel-truss structure of Old Bridge over the Danube in Bratislava .....	217
Chmielewski T., Górska P.: Review of some research on the full-scale monitoring of civil engineering structures using GPS .....	229

Flaga A.: Basic principles and theorems of dimensional analysis and the theory of model similarity of physical phenomena .....	241
Gnatowska R.: An analysis of incoming wind pulsation on the wind erosion processes on a hill .....	273
Kisiel P., Mikulski Z., Kwiecień A., Fielek P.: Reduction of displacement in concrete tram tracks under environmental effects using Polymer Flexible Joint technology .....	281
Klemm K.: The assessment of microclimatic conditions in a well-spaced urban structure .....	291
Kuznetsov S., Pospíšil S., Král R.: Climatic wind tunnel for wind engineering tasks.....	303
Sasaki R., Akahoshi A., Uematsu Y.: Relationship between surface roughness and turbulence of natural winds near the ground surface .....	317
Szczepańska-Rosiak E., Heim D.: The effect of wall thickness and window position on efficient daylight utilisation in building interiors .....	331
Szeląg A., Flaga A.: An acoustic study of the auditorium hall to be located in the proposed building of the Applied Acoustics Laboratory of Cracow University of Technology .....	343
Thiis T.K., Ferreira A.D., Molnar M., Erichsen A.V.: Characterization of shear stress distribution on a flat roof with solar collectors .....	359
Zaborski A.: Simulation of concrete corrosion and interaction surfaces using cellular automata .....	369

#### SNOW LOAD AND ICE LOAD

Delpach P., Thiis T.K.: Applications of “snowind” engineering – climatic wind tunnel methods .....	381
Fikke S.M., Nygaard B.E.K.: Assessing environmental actions from modern meteorology .....	405
Górski P., Tatara M., Pospíšil S., Kuznetsov S., Marušić A.: Investigations of Strouhal numbers of iced cable models of cable-supported bridges with respect to angle of wind attack .....	417
Kimbar G.: Dynamics of snow melting on tents during possibly threatening precipitation .....	433
Pichugin S.F, Dryzhyruk Y.V, Popovich N.M., Chernetska I.V.: The features of snow loads on building roofs .....	441
